

Shawsville 5K Results

Monday, July 4th, 2011

At the 8:00 AM start of the race, the temperature was mid-70s, but the humidity was already making its presence felt. There was only the slightest of breezes. Two hundred and twelve people completed the race this year, which was very close to average for the history of this event.

From registration to results, members of the Shawsville and Elliston Ruritan Club contributed greatly on race day. This marks the inauguration of a collaborative effort between the Ruritans and Eastern Montgomery High School in staging this race in the future.

There will be one significant change next year, which arises out of a chance remark from one participant and some consequent reflection. Namely, the age ranges for younger runners will be modified to better account for maturational differences in teenage runners. I've come to believe, in other words, that the 13-18 age grouping is too broad, and so it will be subdivided. The age groups both immediately above and below this range will also be marginally adjusted, so that there will be fourteen age groups next year, instead of thirteen as in the past.

Thanks to all the runners for having helped make the 2011 edition of the Shawsville 5K a success!

Fastest Family

A total of ten families entered teams, which is the greatest number in the history of this event. Last year's champions, the Knowles family, were present to defend their title. But this year two other families competed hotly for the title. In the end, it came down to a "total elapsed time" tie-breaker. Congratulations to the **Munsey family from Giles County** for their win. However, notice that if the Fortners had designated daughter Jessie instead of Dad, Mike, *they* would have won the championship! We hope both of you will come back next year to renew your rivalry.
